

Greater Manchester ESOL Advice Sessions

Do you have customers or employees who speak other languages and need to improve their English? Learning English can help them get a job, get a better job, get a qualification, be more independent in everyday life or support their children at school. There are many opportunities to learn or just practise English in Greater Manchester in adult learning centres, colleges and community organisations. They could also join an informal conversation group. ESOL Advice Service can help your customers find the right learning opportunity for them. At an ESOL Advice session, a qualified teacher will check your customer's speaking, listening, reading and writing skills and also find out about your customer's needs and goals. Your customer could be offered a learning opportunity straight away or they will go on a waiting list for an English language course that is right for them. If they have to wait for a place on a course, they will be contacted as soon as the place becomes available. They only need one assessment in any of these areas of Greater Manchester. Contact your local ESOL Advice Service today to arrange an assessment for your customers or employees and get them into learning English.
